Spoken Briefing Draft (M6)

15 Oct 2026 · The AI speaks the one-pager – cited, without judgement; the presenter cuts and signs responsible.

What is it?

The one-pager shows the situation on one page. Whoever presents it needs a first draft of the words – and must not read it aloud. Pattern M6 of the AI paper: the AI drafts the BLUF briefing, the human checks, cuts, delivers. A draft is not the briefing.

What it does

• --onepager page.html --narrate PROVIDER writes a speaker's note page.html.briefing.md next to the page: 8 to 12 sentences, about 90 seconds
• Fixed order: BLUF, four dimensions (where do we stand, what has changed), decisions needed named only, data confidence
• Contract = the one-pager's cells as citable facts E/… plus the fact index of the stand; every statement cited, every number backed
• Same guards as D3/D4, evidence purpose m6_briefing; discarded means: the one-pager stands, the file names the reason

Three decisions

Own file, page AI-free. The one-pager stays byte-identical; its footer 'no AI involved' stays true. The note opens with the sentence that it is not the briefing.
Speak the slide, do not build a second picture. The cells themselves are citable – the draft backs what the slide shows and takes depth from the fact index.
No judgement, no option. Column 3 is named verbatim; what follows is the presenter's. Not included on purpose: translation, noise audit, recommendation.

How to use it

```
python -m portfolio portfolio.json --onepager page.html --since-snapshot snapshots/snapshot_prev.json --
python -m portfolio portfolio.json --onepager page.html --narrate export
```
