Situation Briefing One-Pager

13 Oct 2026 · Four dimensions, three questions, one page – and the judgement stays with the presenter.

What is it?

A board does not want 200 pages but one slide everyone can read at once – and the division head who defends it aloud. The situational picture has had every number for that; they were just spread over many pages.

What it does

• Four dimensions (flow, quality, value, dependencies) × three questions (where do we stand, what has changed, what follows) on one A4 page, BLUF on top, confidence per cell
• Everything from the existing registers and metrics – no new arithmetic; column 2 from the delta briefing when an earlier snapshot exists
• Column 3 only names where a decision is due: wake-up call, surviving flow problems, violations, overdue items – plus a line for the presenter
• Kata mode: the same page empty, as the practice sheet for 'a situation analysis in 30 minutes'

Three decisions

No judgement in the machine. The tool shows where an agreed decision point is reached. What follows, a human writes into the empty line – the same non-feature as in the harmonisation score and the AI layer.
No traffic light over everything. Four rows, each with its own confidence, instead of one green watermelon. Whoever wants green has to read four cells.
BLUF from templates. The first sentence names the largest deviation with its numbers – headline kata after Hohpe, no AI. The AI reading (M6) comes on top later.

How to use it

```
python -m portfolio portfolio.json --onepager page.html --since-snapshot snapshots/snapshot_prev.json
python -m portfolio portfolio.json --onepager kata.html --kata
```
